

#### Sufficiency for whom? A global perspective

Dr. Yamina Saheb

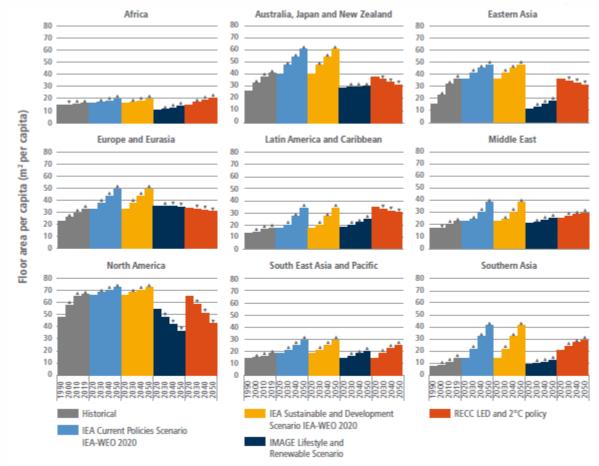

Yamina.saheb@sciencespo.fr

# Sufficiency requires a metamorphosis of our vision of the world

"Sufficiency <u>policies are a set of measures and daily</u> <u>practices</u> that <u>avoid demand for energy, materials, land</u> <u>and water</u> while delivering <u>human wellbeing for all</u> <u>within planetary boundaries</u>."

#### Wellbeing for all means equal access to decent living standard for all

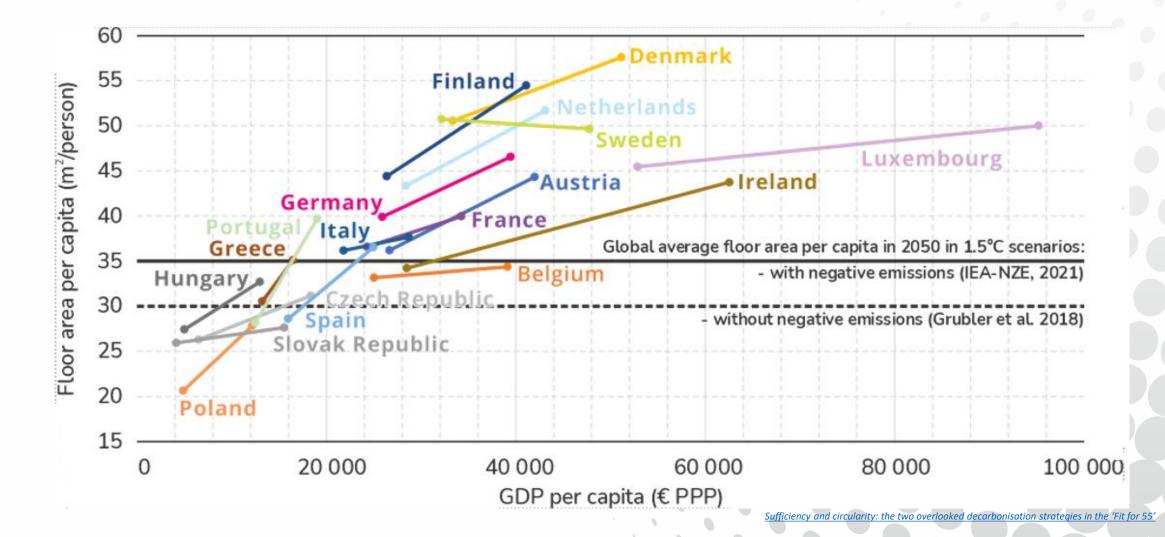

Regional historical and projected residential floor area per capita in selected scenarios considered in IPCC AR6

Fig 9.6 of the building chapter of IPCC ARE

### Sufficiency changes the sustainability ranking of EU countries

## Planetary boundaries require setting equity-based carbon neutrality target

SEIGIEMO

Estimated year to become carbon neutral in selected countries by setting equity-based target
