

Inspire, develop and draw on **European education capabilities** to support the changes needed for a climate-neutral society

by

deciding collectively  
acting collaboratively  
adapting sustainably

Advance as a **participatory community** led by teachers and students with their schools and networks, and other educational actors to work and progress together

**Tackle fragmentation** between educational sectors, domains, actors and stakeholders, including leadership

Education for Climate

Advance as a participatory community through **diverse community engagement**

Tackle fragmentation through **inclusive community structures, processes and practices**

Mobilises all relevant education actors through **awareness raising** and **qualitative exchanges** to invite participation and imagination

Takes a **holistic and inclusive** long-term learning approach

**Connects education actors** engaged in education for climate activities towards a more integrated schools system approach

**Bridges education with science and business** and links with existing or emerging climate change strategies

Builds capacity by **co-creating learning experiences** to develop students' and teachers' future-oriented skills and competences

**Starts with grounded experiences and multiplicity** of engaged core groups to facilitate qualitative outcomes

## Community participatory challenges for collective action

### Connect

Let's be an inclusive community and engage  
**Bring together your peers**

### Peer area

Search and find people, initiatives and competencies

### Unlock

Let's be a curious community and explore  
**Raise your challenges**

### Challenge incubator

Crowdsource questions and solutions on the ground

### Develop

Let's be a creative community and innovate  
**Co-create your collective challenge journey**

### Challenge experimentarium

Ideate around converging challenges

### Re-use

Let's be a diverse community, reach out and share  
**Upcycle your collective challenge solution**

### Knowledge library

Implement and promote co-validated solutions
